

BASIC CHEMICAL INDUSTRIES

CHEMISTRY WITH ASSURANCE™

ABOUT BCI

Since its inception in 1973, Basic Chemical Industries (BCI) has grown to become one of the leading chemical companies in the Kingdom of Saudi Arabia. BCI is a publicly traded company and, for decades, has been supporting the Saudi industrial and consumer market by providing high-quality chemical products and services.

From the outset, the company's expansion and innovation programs have been a continuous process of adopting the latest methods of research and production, which has maintained BCI as the leader in its field.

OUR HISTORY

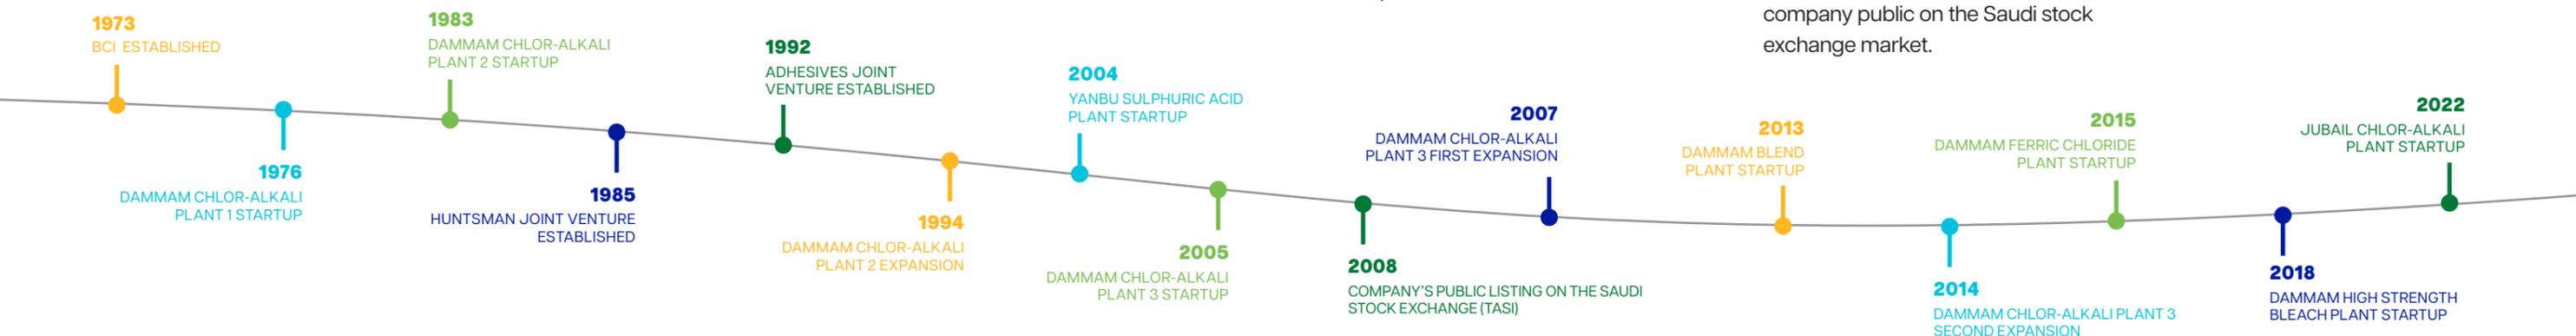

In 1973 Mohanna Abdulaziz Almoaibed set out to establish a chemical manufacturing company in the Eastern Province of Saudi Arabia, which was a highly unusual business venture at the time.

In its early years, the company faced several obstacles, including financing. However, with the support of local investors and additional financing through international banks, and despite the skepticism on the viability of the project, Almoaibed and his partners pushed forward and successfully established the very first Chlor-Alkali manufacturing facility in Saudi Arabia. The Dammam plant started production 1975.

Investors and partners included prominent family businesses like Al-Othman and Al-Muammer, Fahad and Abdulrahman Al-Jindan company, Darwish bin Abdullah Al-Darwish, Al-Tamimi and Fouad, Mohammed and Abdulrahman Al-Bawardi, Abdulatif Alali Al-Issa and Sons company.

In 2008, to ensure its continuity into the future, BCI's shareholders made a unanimous decision to take the company public on the Saudi stock exchange market.

Over the years, BCI's employees, manufacturing logistic facilities, and product offerings and partnerships grew in response to its customer needs and the build-up of trust. The group took major leaps forward in going beyond basic chemicals by establishing joint ventures with global corporates to produce and sell specialty chemicals.

CHEMISTRY WITH ASSURANCE™

Our company tagline highlights with two words what we strive to deliver to our customers every day

CHEMISTRY

We are diverse, supplying chemistries to virtually every industry, from basic to speciality chemicals. We understand our customers' needs and work to deliver total solutions around them.

ASSURANCE

We safeguard the continuity of our customers' operations by understanding their critical success criteria. With the help of our logistical capabilities, we provide multiple variations on assurance like pricing mechanisms, long term contractual agreements, uninterrupted supply models and much more.

OUR VISION

To become the partner of choice by creating value and delivering assurance

OUR VALUES

- **WE WORK SAFELY:**
We protect ourselves, our colleagues and customers, and the environment around us.
- **WE REACH OUR GOALS:**
We plan, execute and hold ourselves accountable to our results.
- **WE CHALLENGE OURSELVES:**
We strive to continually improve our processes and systems.
- **WE COLLABORATE:**
We share knowledge and support each other, promoting diversity across the organization and encouraging different opinions.
- **WE DO THE RIGHT THING:**
We are honest. We are reliable. We act with integrity.

CONTRACT MANUFACTURING CHEMICALS

BASIC CHEMICALS

Being one of the earliest Chlor-alkali producers in the GCC area, BCI's expertise in producing and distributing Chlor-alkali derivatives in Saudi Arabia and the region goes back to its inception days.

Our Basic Chemicals division caters to customer requirements in the below chemistries:

- Liquid Chlorine
- Caustic Soda (32%, 49%, flakes)
- Sodium Hypochlorite 12.5%
- Hydrochloric Acid 31%
- Sulphuric Acid 98%
- Battery Acid and Electrolytes

INDUSTRIAL CHEMICALS

The Industrial Chemicals division provides many industries with organic and inorganic specialty chemicals and technical services. This is often undertaken in collaboration with our world-class chemical partners from Europe and North America.

– **Paints and Coatings**

A wide range of high-performance additives, dispersion, and coalescing agents, rheology modifiers, defoamers, biocides, stabilizers, and resins.

– **Oil, Gas, and Petrochemicals**

Gas treatment solvents and removers of acid gases, CO₂ and H₂S, and unwanted molecules such as mercaptans and carbonyl sulphides.

– **Steel Galvanizing**

In addition to being a supplier of Hydrochloric Acid to the galvanizing industry, BCI supplies chemical additives to improve the quality of the finished product of galvanized steel and control the cost of the process. The range also includes degreasers, flux salts, wetting agents, and corrosion inhibitors for Flux Kettle Operations, Zinc Kettle additives and post-treatment additives.

– **Commercial Laundry**

BCI's locally manufactured SUPERKLENE line for commercial laundries.

– **Beverage Manufacturers, Dairy Operators, Farmers**

Industrial Chemicals provide a wide range of detergents, disinfectants, and maintenance chemicals across these Industry sectors.

WATER TREATMENT CHEMICALS

BCI's Water Treatment division provides total solutions to prevent operational problems, protect customer assets, and maximize efficiencies.

We provide on-site water testing to troubleshoot and diagnose system problems, as well as access to our analytical laboratory, used for more specialized water testing and performance testing of new applications.

BCI chemistries include:

- Oxygen scavengers
- Corrosion and scale inhibitors
- Dispersants, biocides, and algaecides
- Antifoams
- Flocculants and coagulants
- Activated carbons
- Ion-exchange resins
- Ferric chloride 40%

The Water Treatment Chemicals division serves the water and wastewater sectors with:

- Desalination Plants - Reverse Osmosis and MSF
- Waste and effluent treatment systems
- Boiler water systems
- Cooling and chilling systems
- Potable and firewater systems

CONTRACT MANUFACTURING

BCI's expertise and extensive infrastructure have attracted business partners who wish to reduce costs, increase, or maximize in-country value, or focus on their commercial operations.

The Contract Manufacturing division provides access to BCI's extensive expertise in chemical manufacturing and supply chain infrastructure with a complete end-to-end template of services or bespoke solutions catered to requirements and business needs.

This includes but is not limited to:

- Raw material procurement, including importation, customs clearance, warehousing and management of inventories.
- Production of finished product to business partners' exact specifications and methods with broad experience in various temperature-controlled mixing for aqueous, solvent-based, and powder-based batch processing.
- Warehousing of finished products including climate-controlled warehouses.
- User-ready packaging and labelling.
- Delivery and export services to partners' facilities or end user sites.
- Protection mechanisms of principal Intellectual Property related to product formulations, markets, and other related commercial aspects.
