Scalable stations

New generation wastewater treatment plants

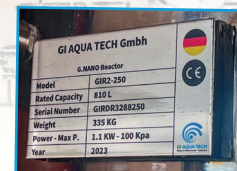

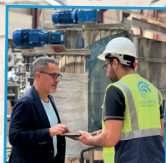

## Domestic Wastewater treatment

*Join us in  
shaping the future of water*

**GI Aqua Tech** has pioneered its own G-Nano technology, the most important development in non-biological wastewater treatment this decade.

### ***A Challenge solved***

We faced a huge challenge when one of our important clients, the Samhan Heritage Hotel in Diriyah gate (DGDA) in Riyadh, asked us to build a wastewater treatment plant in the basement of the building, for both black and grey wastewater simultaneously.

We dealt with reality, customized to the exact needs , and designed a special unit for the hotel to suit the difficult conditions and small space.

We succeeded in, the treated effluent will be used in irrigation and toilet flushing, achieving 100% recycling and a decentralized approach.

***Wastewater treatment is a necessity, not a luxury***
